

LUKE ROWE

lukeroweprivate@gmail.com | 805.868.3601 | github.com/RogShotz

SKILLS SUMMARY

- Proficient in Python, C/C++, Java, Lua/Luau, Shell, HTML/CSS
- Familiar with Linux, Git, AWS CodeCommit, Selenium, PyAutoGui, Pandas, Requests, Tensorflow, OpenCV
- Background in Cyber Security, Robotics, and Video Game Development

EDUCATION

Bachelor/Master of Science Degree in Computer Science

June 2023/June 2025

California Polytechnic State University, GPA: 3.644/ 3.433

COURSEWORK

Binary Exploitation, Advanced Deep Learning, Advanced AI, Operating Systems, Systems Security, Knowledge and Discovery from Data, Computer Security, Natural Language Processing (NLP), Interactive Entertainment

WORK EXPERIENCE

Project Software Developer, CCI (Cali. Cybersecurity Institute)

June 2021 - October 2023

- Developed learning material to train minors and adults, about cyber security. Presented the material for 10 weeks
- Designed, created, and collaborated with a team to create a robust discord server and bot through discord.py API
- Coordinated/developed two international CTF cybersecurity events supporting over 400 participants each

Forensics Intake Software Developer, 3CFL (Cali. Coast Cyber Forensics Lab)

June 2022 - September 2022

- Worked with military cyber security professionals and implemented fixes/additions for their evidence intake software
- Coded a backup system with custom bash scripts for sensitive evidence intake forms

Tutoring, Allan Hancock STEM Center/ Cal Poly Computer Science Dep.

Spring 2019 - Spring 2025

- Problem solved assignments and questions with peers at both colleges to help them with academic problems
- Both public and private tutoring, helped debug and guide students to solve problems and develop effective code

LEADERSHIP & OTHER

Robotics Lead, Orcutt Academy High School

2015 - 2019

- 4 Years of robotics, 2.5 years of being software lead for a world level robotics team (2x world qualified)
- Embedded software development and robotics programming

Eagle Scout, Boy Scouts of America

2012 - 2018

- Leadership roles of chaplains aid, patrol leader, and scout guide
- Leadership training at the National Youth Leadership Training

PERSONAL PROJECTS

Masters Thesis, Security In Anti-Cheat (<https://digitalcommons.calpoly.edu/theses/3138/>)

2025

- The most common modern day cheating methods in relation to client -> server exploits in video games
- Research involving practical anti-cheat solutions using Roblox's game engine and luau

CSUCP Culminating Senior Project | Python

2023

- Developed an automatic Linked In job application bot through selenium
- Implemented: Multi-threading, data scraping, verification, and automation experience

Engage Bot | Python

2023

- Developed an automated discord bot
- Implemented: Swear filters, async updating to keep bot running 24/7, leveling, role management, AWS hosting

IMTD Automated Bot | Python

2023

- Developed a bot to automatically play a game fully with no human intervention
- Implemented: Pyautogui for automation, OpenCV for image detection and text abstraction, multi-threading
